

Climate guide.fi

A national portal for diverse
climate change information
launches in September 2011

Understand the change and its impacts

A comprehensive set of
information on climate change,
its impacts, mitigation of it and
how to adapt.

Learn from the past, look to the future

Observed and anticipated
climate change and its impacts
conveniently through maps,
graphs and tables.

Community response – Plan and execute

Support for local scale planning
and decision making as well
as options for adaptation and
mitigation in municipalities.

Climateguide.fi is developed co-operatively
by Finnish Meteorological Institute, Finnish
Environment Institute (SYKE) and Aalto University
Centre for Urban and Regional Studies (YTK).

Climateguide.fi is being created in a three year
EU Life+ project (*LIFE07 INF/FIN/000152
CCCRP*).

The portal organises diverse, research based and
practical climate change information into a more
uniform format under one address.
